

Work Plan

<p>1 Plan improvements and prepare NEPA documents</p> <p>2 Isolate the area from livestock and other uses.</p> <p>3 Remove invasives species</p> <p>4 Remove informal roads & improve access road</p>	<p>5 Install public use facilities</p> <p>6 Public outreach and education</p> <p>7 Project Dedication</p> <p>8 Evaluate Project success</p>
---	---

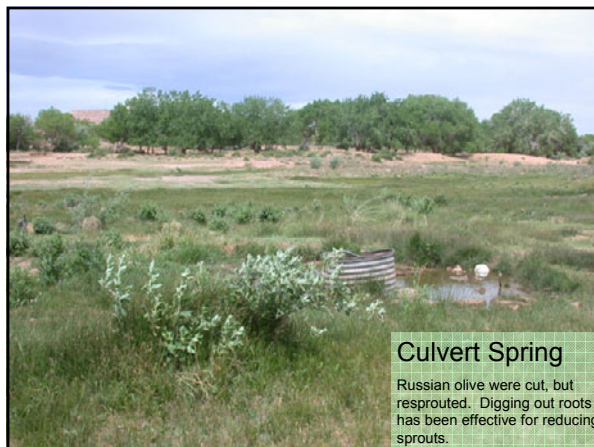

Perimeter Fence

Locating groundwater
using a soil auger.

(Soil auger was also used to drill
holes for pole plantings of
narrowleaf cottonwood collected
at Wepo.)

Burn Out Your Volunteers Method

Drilling holes with a 3-foot auger bit

Breaking up bullrush
roots so the rushes don't
wrap around the bit

Wiggling the
auger helps

Sometimes you
need a little
extra leverage

NRCS Plant Materials
Center, Los Lunas,
New Mexico grew
these potted trees from
Goodding willow
cuttings.

Keep potted trees
well watered prior
to planting.

Celebrate

Camelthorn mechanical treatment

Swales – alkali sacaton, Indian rice grass
Flats – sand drop seed, Indian rice grass

Planting willow poles using the waterjet stinger

Planting potted trees using the waterjet stinger

Lanceleaf cottonwood

Culvert Spring

June 2004

April 2006

Fremont cottonwoods and coyote willows at Beaver Dam
